

## Revolutionize Your Swing with Golf's Most Advanced Glove

SensoGlove is the first and only golf glove with built-in sensors that constantly reads the pressure of your grip. Practicing with SensoGlove will teach you the correct grip pressure for a smooth, consistent swing that delivers greater distance, enhanced precision and lower scores.

**Instant feedback shows grip pressure at every finger, allowing you to increase or decrease your grip for a more consistent swing**

**Small sensors monitor your grip pressure continuously, without changing your feel for the club**

**Highest quality cabretta leather golf glove with fine grain and exceptional durability**

**Adjustable pressure settings allow you to select the grip that is right for you and store that setting in memory**

### Use SensoGlove anytime and anywhere!

- Use SensoGlove for practice in the backyard or on the driving range.
- The computer easily snaps off so you can use SensoGlove just like any other quality leather glove
- Save your favorite grip pressure setting in the built in computer and train with that setting as you practice or play

### How It Works

Introducing SensoGlove, a high-quality cabretta leather golf glove with a unique difference: it's the first and only golf glove with a built-in computer that constantly reads your grip pressure. Using small, highly responsive sensors, the SensoGlove provides audio and visual feedback about your exact grip pressure on the club.

Every golfer wants to hit the ball far and the natural instinct is to swing harder and faster. But trying to swing with more power causes a death grip, creating tension in the hands, wrists, arms and shoulders. The result is a less than smooth swing and, even worse, tightened muscles. Tight muscles result in slower – not faster – club head speed.

You can use SensoGlove anywhere... backyard practice, on the driving range or during a practice round. With SensoGlove, you get an immediate readout of your exact grip pressure, on a scale of 1 to 12. Grip too tight, and a gentle audio cue warns you.

SensoGlove isn't just for your driver either. Lighter grip pressure improves precision, too. Use it for chipping and putting to dramatically improve your short game!

### SensoGlove: Improve Distance

A lighter grip delivers greater distance

It is a well known fact among golf instructors that a relaxed grip is key to a powerful, consistent and natural golf swing. Yet it is hard to transfer this principle into the golf swing. Even though a golfer might think to hold the club lightly, during an actual swing their relaxed grip is gone, they tense up and then swing poorly.

The SensoGlove provides a solution to this universal problem by providing real-time feedback of the correct grip pressure at every point of the swing, from address through take-away, backswing, downswing, impact and follow-through. This teaches how lightly a golfer can hold the club without giving up control or power.

### Train with the SensoGlove to learn:

- Better rhythm, tempo and timing
- Natural turning and cocking of the shoulders, arms and wrists
- Natural opening, closing and release of the clubhead
- Increased clubhead awareness
- Higher acceleration of the arms for maximum power production

*"Grip the club as if you were holding a baby bird."*  
Sam Snead

*"Tension destroys motion"*  
Bob Toski
